# CLAMP 213

Bridge clamp with quick-release closure - quick disassembly without tools

CLAMP 213 is a bridge clamp with quick-release closure developed for externally corrugated spiral hoses. The quick-release mechanism allows the clamp to be opened and closed without tools - a significant advantage in installations where the hose periodically must be detached for cleaning, servicing or replacement. 24 dimensions with clamping range from 50 mm to 405 mm cover the AIRDUC series' larger dimensions and the industrial range. The weight and clamping range are typically developed for fixed industrial installations where disassembly frequency is higher than on permanently mounted systems.

## Dimensions and ordering

The hose is supplied in 24 standard sizes from inner Ø 50.0 mm to 405.0 mm. Each size has its own article number. Standard roll length is typically 10 m, and the hose can be cut to length.
