CONNECT STORZ SAFETY 8511

Storz system safety clamp with joint, rubber cover and adjustable lock - 3 sizes A/B/C

CONNECT STORZ SAFETY 8511 is a Storz system safety clamp with an entirely different function than the standard Storz adapter. Where the 251 adapter offers a thread connection to standard pipe connection, the 8511 safety clamp is a SECURING solution that can be applied to an already-mounted Storz coupling to ensure the coupling is not unintentionally opened. The construction is a steel band with joint (knee-link allowing the clamp to bend around the Storz coupling), rubber cover profile (rubber coating protecting the coupling surface) and adjustable lock (adjustable lock bolt). This is particularly valuable in applications where an opened Storz coupling would pose a safety risk - e.g. high-pressure installations where unintentional uncoupling could cause whip-back, or permanent installations where lever mechanism failure would break the pipe connection.

Technical specifications

Material	Steel band + rubber cover profile + adjustable lock
Wall construction	Storz safety clamp with joint, rubber cover and adjustable lock
Cut to length	No
Manufacturer SKU	8511

Standards and compliance

REACH, RoHS

Dimensions and ordering

The hose is supplied in 3 standard sizes from inner Ø 66.0 mm to 133.0 mm. Each size has its own article number. Standard roll length is typically 10 m, and the hose can be cut to length.

Inner Ø [mm]	Weight [kg/m]	Article no.
66	0.243	8511066000
89	0.279	8511089000
133	0.364	8511133000

The table shows the product's standard dimensions. Weight column is per piece.

Other Particulair microsites

We build specialised microsites for critical industries. Each site provides in-depth product data, documentation and expert guidance for the domain it covers.
