

ACCESSORIES

GEKA hose tail med securing ring

GEKA hose tail with securing ring - brass, for suction and high-pressure applications, 25 bar

GEKA is a German-based coupling system developed in 1934 and widely used in construction sites, fire brigade applications, water treatment and industrial process. Our GEKA hose tail with securing ring is a combination of hose tail and securing ring that together ensure a leak-free joint withstanding both suction (vacuum) and high pressure (up to 25 bar). The material is brass with NBR seal - a combination resistant to water, many organic liquids and normal steam below 90 deg C. The GEKA system has lug construction (claw construction) locking via quarter turn - same principle as Storz but with different geometry.

Technical specifications

Material	Body: brass. Seal: NBR. Colour: black
Colour	black
Wall construction	GEKA hose tail with securing ring and NBR seal
Cut to length	No
Manufacturer SKU	5316

Standards and compliance

REACH, RoHS

Dimensions and ordering

The hose is supplied in 4 standard sizes from inner Ø 13.0 mm to 32.0 mm. Each size has its own article number. Standard roll length is typically 10 m, and the hose can be cut to length.

Inner Ø [mm]	Outer Ø [mm]	Press. DIN [bar]	Weight [kg/m]	Article no.
13	40	25	0.185	5316013040
19	40	25	0.213	5316019040
25	40	25	0.254	5316025040
32	40	25	0.328	5316032040

The table shows the product's standard dimensions. Weight column is per piece.

Other Particulair microsities

We build specialised microsities for critical industries. Each site provides in-depth product data, documentation and expert guidance for the domain it covers.
